The K-Flectors

1

MIRROR / Extremely hard, good for redirecting light.

2

FLAT / Hard circular reflection.

3

FLAT / Medium soft circular reflection.

4

FLAT / Very soft circular reflection, ideal as fill or "moon" light.

5

enveloping light, comet tail effect

6

Narrow ripped / Hard linear reflection, helps creating a narrow lighted zone

7

Wide ripped / Soft linear reflection, similar to # 4, but with directional reflection

8

Hammered medium / Soft sprinkled reflection

9

Hammered fine / Very soft sprinkled reflection

10

Hexagonal domed 16 mm Concave,
Soft elliptic reflection

11

Hexagonal domed 16 mm Convex,
Soft elliptic reflection

12

½ matt hexagonal domed 17 mm Concave,
Medium hard elliptic reflection

13

½ matt hexagonal domed 17 mm Convex,
Medium hard elliptic reflection

14

Hexagonal domed 33 mm Concave, Soft elliptic reflection with “cucoloris” effect depending of the distances

15

Hexagonal domed 33 mm Convex, Soft elliptic reflection with “cucoloris” effect depending of the distances

16

Shiny hexagonal domed 17mm Concave, Hard elliptic reflection with “cucoloris” effects depending on the distances

17

Shiny hexagonal domed 17 mm Convex, Hard elliptic reflection with “cucoloris” effects depending on the distances.

FURTHER COMPATIBLE LIGHTING DESIGN TOOLS

Besides the K-BEAMS, several other light sources can be used in combination with K-Flectors.

Dedo Weigert has added to his large palette of equipment 2 Parallel Beam Attachments (DPBA) specially designed for the Reflect Lighting System.

Both DPBA create, mounted on DEDOLIGHT units such as

Tungsten: 150 W or 650 W

HMI: 200 W or 400 W

DLED: 40 W or 90 W

very strong parallel beams, ideal to be combined with K-Flectors TT, S, M and L.

Beside this, the K-Flectors work also well with some PAR bulbs (e.g. GE sealed beam) and some units like the HMI JOKER BUGS and the LED Fresnel HEXOLUX.

Actually, each light (continuous or flash) can be reflected, so for example the light provided by a candle, by a flashlight or by a LED ceiling lamp, but the best efficiency and results are of course achieved with parallel light beams, including sunlight. Results will be less satisfactory with diffused light sources and with luminaries using multiple (LED) light sources.
